

Heywood Park in the City of North Vancouver

Photo's:

- A) Public washrooms. North Shore Fish and Game Club Salmon Enhancement Incubation Project on the right.
- B) Heywood Park, a lovely setting for public events and our information kiosk. Note the streambank vegetation within the park, good solid trees in place, we can plant the understory. This pathway leads to a lovely 2nd growth forested ravine.
- C) Childrens play area on right bank of creek, recent high water caused some erosion, excellent opportunity for easy planting project for all ages.
- D) Invasives have a firm grip on native vegetation in many areas.

Next Page

- E) Up, up, and away. These need to be nipped in the bud.
- F) Site of recent District of North Vancouver riparian restoration efforts.
- G) Site of recent District of North Vancouver instream restoration efforts.
