

## **Option One: Special Meeting**

### Objectives for Special Meeting on Climate Change:

- Understanding of the impacts of climate change on the North Shore
- Document possible actions to reduce the impacts of climate change on North Shore fish

### Scope

Joint Meeting with other organizations interested in climate change impacts on the North Shore

- Stream Keeper members - North and West Vancouver
- Fish & Game Club - members
- Community Associations - representatives
- North Shore teachers – leaders of environmental clubs
- Cool North Shore – project leaders
- Outdoor clubs that use and build trails
- Other?

### Speakers

- Pacific Climate Impacts Consortium or BC Environment on climate change modeling and specific impacts on the North Shore
- Pacific Salmon Foundation on what good salmon habitat looks like and what has happened to it on the North Shore
- Facilitator to capture a list of possible actions participants could undertake to reduce the impacts of climate change on fish

### Venue

- Lynn Valley Library
- District or City Hall

### Timing:

- Q2 2016

### Duration:

- 2 hours

### Budget:

- TBD

### Example Ideas for action:

Increased cover for waterways

Re-purchase waterway setbacks

Update of laws defining and protecting waterway setbacks

Fund enhanced enforcement of existing fish protection requirements

Get “people of power” onto the streams to see firsthand what good (or bad) looks like

Protect undeveloped sections of watersheds

Support storm water management efforts and programs

Support “positions” in government that engage with communities

## **Option Two: Public Lecture**

### Objectives for Public Lecture:

- Understanding of the impacts of climate change on North Shore and its impact on fish
- Share possible actions to reduce the impacts of climate change on North Shore fish

### Scope

CapU or other Lecture Series (include for Q&A from audience)

- Students and staff of CapU
- Public
- Stream Keeper Members - North and West Vancouver
- Fish & Game Club - members
- Community Associations - representatives
- High school biology teachers – leaders of environmental clubs
- Cool North Shore – project leaders
- Outdoor clubs that are building trails

### Speakers

- Speaker to review climate change basics
- PCIC or BC Environment on climate change modeling and specific impacts on North Shore
- Pacific Salmon Foundation on what good salmon habitat looks like and what has happened to it on the North Shore
- Stream Keepers representative to outline possible actions to reduce the impacts of climate change on North Shore fish and solicit public support for actions

### Venue

- CapU
- Centennial Theater

### Timing

- Q2 2016

### Duration

- 2 hours

### Budget / Funding

- TBD

### Locations to Advertise:

- NSN
- Library
- Community Centres
- Community Associations, other?
